

Senior-led advisory for organizations navigating complex technology transformation.

RSV Consult is an independent advisory firm — not a system integrator, not a product reseller. No conflicts of interest, no vendor relationships. Pure advisory across the full technology agenda, with the execution depth to make strategy real.

PRACTICE AREAS

— 01

IT Strategy & Transformation

Operating models, governance, decision rights and roadmaps that translate strategic ambition into executable programs with clear accountability.

— 02

Cloud & ERP Transformation

Integrated governance connecting architecture, FinOps, security and business. Prevent cost overruns, architecture drift and multi-vendor misalignment.

— 03

Cybersecurity & Digital Resilience

DORA and NIS2-aligned integrated resilience: tested recovery, third-party governance and board-level reporting — beyond compliance documentation.

— 04

Digital & Open Banking

API products, partner economics and commercial models that convert PSD2-era compliance investment into scalable ecosystem revenue.

— 05

IT Cost & Value Capture

Value-capture frameworks linking savings to technical levers, named owners and financial evidence reconciled to the general ledger — not only forecast.

— 06

Strategic Alliances & Growth

Alliance operating models — commercial terms, joint governance, pipeline mechanics — that convert partnership ambition into measurable revenue.

WHAT SETS RSV CONSULT APART

Fully independent

No vendor relationships, no product reselling, no system integration business. Pure advisory — the only interest is the client's outcome.

Strategy to execution

From governance design to delivery tracking. Every engagement is structured around decisions, ownership and measurable results — not deliverable lists.

Regulated-industry depth

Specialized in financial services, banking and insurance operating in complex regulatory environments: DORA, NIS2, PSD2, Basel, sector-specific frameworks.

Cross-border capability

Proven delivery across EMEA, the Gulf and Italy — in multi-stakeholder, multi-currency, multi-language transformation environments.
